

**Propelling growth  
across industries.  
Paving the way for  
digital transformation.**

Eng. Maqbool Al Wahaibi, CEO

“

The Fourth Industrial Revolution involves the utilization of new innovative technologies such as artificial intelligence, cloud computing, robotics, 3D printing, the Internet of Things, and advanced wireless technologies to name a few. These technologies are helping to transform businesses and create disruption. Innovation coupled with use of such technologies revolutionize the way businesses are operating and creating value for the users, resolving problems, and accelerating the growth of business across sectors. At Oman Data Park, we are creating an ecosystem with our international partners to localize the cloud component and catalyse the growth and data security for various sectors in Oman. We are also prioritizing our focus on building our artificial intelligence portfolio, thus assembling the three pillars – cloud, cyber security and artificial intelligence to meet the future needs of our customers.

## Excellence lies at the core of our business

With a remarkable track record over 9 years, we have been the recipient of a number of awards and recognitions from local as well as international platforms including Excellence in Data Management and Best in Cyber Security at the Big Data awards 2021, Excellence in Innovative Cloud based services at Oman Banking & Finance awards 2021, Best Datacentre and Cyber Security Centre awards at COMEX 2021, Veeam VCSP Partner for 2020, CISCO Partner of the year 2020, Fortinet Cloud MSSP 2020, Best Digital Data Centre in the Middle East at the Telecom World Middle East Awards 2019 and Best Managed Security Services Provider (MSSP) Award 2019.

After undergoing rigorous auditing and reviews, we have earned many internationally acclaimed certifications including:

- ISO 27001 Information Security Management System which is an internationally recognized best practice framework that specifies the requirements for establishing, implementing, maintaining, and continually improving an Information Security Management System (ISMS).

- ISO 20000 IT Service Management System which governs its Service Delivery operations.
- PCI-DSS (Payment Card Industry Data Security Standard) Certification which provides an actionable framework for developing a robust payment card data security process, including prevention, detection, and appropriate reaction to security incidents.
- OHSAS 18001 certification is the internationally accepted and recognized management standard for occupational health and safety.
- ISO 9001 is a certified quality management system (QMS) to demonstrate our ability to consistently provide products and services that meet the needs of our clients and other relevant stakeholders.

## Infrastructure as a Service (IaaS)

### Cloud Server

Businesses launch into the cloud without a coherent plan and end up spending more. Deploy new apps, migrate large data stacks, test business processes in the cloud without overspending with our on-demand cloud server that makes your journey to cloud seamless and cost-effective. Reliability is ensured by using triple replication of nodes as well as redundancy covered by three data center locations.

[Learn more](#)

### Microsoft Azure Stack

Businesses are struggling to improve their app development because of the differences between servers, architecture, and deployment in different locations. Investments in new hardware every five years can be very costly. Improve agility and reduce costs by building modern applications across a locally hosted version of Azure or hybrid cloud environment with the right flexibility and control. Organizations without these tools are today falling behind.

# OUR CLIENT'S SUCCESS STORIES

## Colocation Service for a leading insurance provider in Oman

### TASK

After a major fire incident in its on premise data center, the company felt compelled to identify the right partner that could support the colocation and migration of their Disaster Recovery (DR) site to the cloud without a significant cost impact.

### ODP SUPPORT

Oman Data Park migrated their DR site to its own TIA 942 rated data center to match their expectations and requirements at reasonable costs, while keeping scalability options to meet higher demands in the future for data storage and security.

## Managed Software as a Service for a Ministry

### TASK

A local Government Ministry wanted a solution for its huge archive of manuscripts and to enable a professional and secure method to share this wealth of knowledge with a wider community

### ODP SUPPORT

Oman Data Park delivered to the Ministry in a record time, a complete website with more the 2000 manuscripts uploaded with watermarks to prevent theft and copyright infringement. This new user interface resulted in approximately 50% more searches each month.
